PROFESSIONAL PROFILE

Ranked **Top 1% globally on TryHackMe** with hands-on experience in penetration testing, threat detection, and security tool development. Proficient with **Burp Suite, Nmap, Metasploit, and Python**, with project exposure in browser security auditing, supply chain threat analysis, and malware detection. Targeting roles in **VAPT, SOC operations, and security engineering** — passionate about breaking things ethically to build more secure systems.

EDUCATION

- **B.E in Computer Science Engineering, Chitkara University** Aug 2023 – Jul 2027
 - **Current CGPA: 8.62/10.0**
- **Minor in CS & Advanced Technologies, IIT Mandi** Oct 2024 – Oct 2025
 - **CGPA: 7.8/10.0**

TECHNICAL SKILLS

- **Security Tools:** Burp Suite, Metasploit, Nmap, Gobuster, Wpscan, Nessus
- **Operating Systems:** Linux, Windows
- **Core Concepts:** OWASP Top 10, TCP/IP Networking, CVSS Scoring, Incident Response
- **Programming:** Python, C++, Bash Scripting

PROJECTS

- **ManifestGuard – AI-Powered Browser Extension Security Auditor** | [Live Demo](#) | [GitHub Repo](#) Jan 2026
 - Analyzed **30+ real Chrome extensions**, flagging **5** for suspicious background network activity, built threat scoring engine (0–100) classifying permissions across CRITICAL/HIGH/MEDIUM/LOW severity.
 - Integrated **Llama 3.3 LLM via Groq API** to translate raw permission flags into human-readable risk advisories for non-technical users.
- **Supply Chain Sentinel – Pre-Execution Behavioral Sandbox** | [GitHub Repo](#) Apr 2026
 - Built a **Python** static analysis platform for npm archives combining **Shannon Entropy** scoring, AST/source heuristics, and **YARA-style signatures** to flag malicious packages that evade **npm audit** entirely.
 - Integrated **VirusTotal hash lookup** and a desktop UI with manifest, hex/entropy, strings, and source findings views for analyst-grade triage workflows.
 - **In development:** Docker sandbox, kernel tracing.

CERTIFICATIONS

- **TryHackMe:** Jr Penetration Tester Certificate Sept 2025
- **NPTEL:** Ethical Hacking Certificate Nov 2024
- **Google:** Cybersecurity Professional Certificate Sept 2024

SECURITY RESEARCH

- **Responsible Disclosure – GitHub Copilot CLI v1.0.3 (HackerOne)** Mar 2026
 - Identified an **AI safety filter bypass** where educational prompts triggered generation and persistent local caching of PHP backdoor signatures (`Backdoor:PHP/Perheshell!dha`), flagged by Windows Defender EDR; documented full PoC with session logs and reported via HackerOne.

HACKATHONS & COMPETITIONS

- **MythX - National Level Cybersecurity CTF, KIET Ghaziabad** | [CTF Writeup](#) Mar 2026
 - **Ranked 9th out of 272 teams nationally** (top 3.3%) in a 24-hour jeopardy-style event across Web, Network, and OSINT categories.
 - Identified and exploited business logic vulnerabilities within simulated enterprise-grade environments.
- **VishwaCTF 2026, VIIT Pune (Global Event)** Apr 2026
 - Solved Cryptography and Web Exploitation challenges in a global competition among 1,000+ international teams.
 - Applied custom **Python** scripts for cipher analysis and automated payload fuzzing during the event.
